Key Projects

- **Certificate Verification System (Team Project for KU Hackathon Dec 2025):**
 - Used Blockchain, Solidity and IPFS.
 - Successfully issued certificates with qr generation.
 - Only the issued certificates were found to be valid during certificate verification preventing certificate forges.
- **Portfolio Websites:**
 - Created few responsive portfolio websites, some using AI and some without AI.
- **NFT Marketplace Website:**
 - Implemented HTML, CSS and Javascript to convert a figma design to responsive frontend website.

The websites were deployed live on vercel and the source code is available on GitHub.
